Creative full stack developer who enjoys learning new languages and technologies as needed. I am searching for a company with a great culture and potential to grow professionally.

WORK EXPERIENCE

Second Assistant Superintendent

Twelve Stones Golf Club

June 2021 - current / Goodletsville, Tennessee

- Teaching and instructing team members on the operation and care of all equipment.
- Assist with goal planning (short/long-term) and future capital improvement projects.
- Supervise and perform various maintenance duties to maintain the golf course in proper playing condition according to Company standards.

Junior Software Developer

Eyeconic.TV

Oct 2020 - June 2021 / Bowling Green, Kentucky

- Building and modifying scripts using mySQL, SQL, and mongoDB.
- Creating UI/UX design and wireframes for new business applications.
- Constructing Confluence documents to report the integration process for customer POS integrations.
- Using Postman to test API calls created with node from the POS integrations.
- Identifying problems uncovered by customer feedback, testing, and correcting problems.
- Conferring with team members via Jira, Monday, and Slack to resolve conflicts, prioritize needs, and choose solutions.

Project Coordinator

Benchcraft Company

November 2019 - October 2020 / Nashville, Tennessee

- Prospecting my own leads to develop relationships with business owners across North America.
- Generated over $100,000 in revenue for the company.
- Collaborated with project leaders to comply with accounting needs for project maintenance requirements.

PROJECTS

Spraylogger

Creator

January 2022 - current

- Spraylogger is an application that gives superintendents the ability to log their spraying records.
- The application allows grounds maintenance employees to enter and

  maintain turf spray logs, for ongoing reporting requirements.
- The application is built using NodeJS, MongoDB, and ReactJS. I am also using React Bootstrap for my CSS.

Yardboys

Creator

July 2019 - August 2019

- YardBoys is a web application to give golf course superintendents the ability to create and manage daily job boards.
- The superintendent is able to create jobs for employees, record spray logs, and review historical job activity.
- The application has sign-up, login, and logout functionality, and is built using NodeJS, MySQL, and ReactJS.

Tindcodr

Co-Creator

May 2019 - June 2019

- TindCodr is a web application which allows junior and senior developers to connect with other developers in their geographic area.
- The application allows developers to add projects, post comments, and collaborate on new initiatives.
- TindCodr is a back-end based project using NodeJS, SQL, ExpressJS, JavaScript, HTML, and CSS.
